

GUIDELINES FOR METRO WATER SERVICES (MWS) LOCATION SERVICES

Water Service Lines – MWS will mark this infrastructure under these conditions.

MWS' best information indicates the existence of a connection to the public water main at the designated location, but actual field conditions may differ. Water service lines connecting structures with the public water mains belong to the owners of the properties served. MWS assumes no liability for damage to a water service line resulting from excavation or other activity by others or from any inaccuracy of this record.

Sewer Service Lines – MWS will provide CCTV Logs indicating tee locations under these conditions. (This document is provided as a courtesy.)

MWS' best information indicates the existence of a connection to the public sewer main at the designated footage from the referenced manhole, but actual field conditions may differ. Sewer service lines connecting structures with the public sewer mains belong to the owners of the properties served. MWS assumes no liability for damage to a sewer service line resulting from excavation or other activity by others or from any inaccuracy of this record.
